## Skills

**Languages:** JavaScript, TypeScript, HTML, CSS, GraphQL, Python

**Frameworks / libraries:** React, Redux, Next.js, Node.js, Mobx

**Data viz:** D3, Visx

**Styling:** Tailwind, styled-components, CSS Modules

**Infrastructure:** Docker, Kubernetes, Terraform, AWS, GCP, Vercel, Github Actions, CircleCI, Sentry

**Databases:** MySQL, Postgres, PostGIS

**Testing:** Jest, React Testing Library

## Experience

### Aclima

FRONT END LEAD: OCTOBER 2022 - PRESENT

- Migrate a tile server from Google Cloud Platform (GCP) to AWS. The tileserver was built with Postgres, Kubernetes, Docker, and Terraform.
- Software design and development of data pipeline in Python in GCP.
- Technical lead on a map-centric web application for a statewide initiative. Duties included scoping features, architecture design, and full stack development using React, Next.js, and TypeScript.
- Collaborate with other engineering leads on quarterly planning and ongoing initiatives.
- Conduct weekly 1:1's with two direct reports.
- Serve as the hiring manager for a front end engineering manager.

UI ENGINEER: MARCH 2020 - OCTOBER 2022

- Build and maintain geospatial web applications using React, Redux, Next.js, Mapbox and Deck.gl.
- Develop performant and meaningful data visualization of large datasets using D3 and Visx.
- Lead migration of flagship product from JavaScript to TypeScript.
- Conduct and manage QA cycles across the entire company to ensure successful launches.
- Advocate for and find ways to address technical debt while delivering product-driven features.
- Write technical documentation, especially when working on complex problems that require multiple stakeholders input.
- Pair with designers and product managers to find compromises between delightful designs and engineering feasibility.

### moovel

INTERN AND JUNIOR SOFTWARE ENGINEER: MAY 2019 - JANUARY 2020

- Developed full stack features, using React, Redux, REST in a Node.js service, and MySQL and Postgres databases.

## Education

### Epicodus / Certificate in Web Development

OCTOBER 2018 - MAY 2019, PORTLAND, OR

Learned Ruby, JavaScript and React through pair-programming. The environment was similar to a workplace where we worked for 40+ hours a week and solve problems as a team.

**Humboldt State University** / B. A. Environmental Studies with a minor in Geospatial Studies, Cum Laude

SEPTEMBER 2012 - MAY 2016, ARCATA, CA
